

FY2023 Center for Education and Research on Infectious Diseases (CiDER)

# CROSS-DEPARTMENTAL "INFECTIOUS DISEASES" RESEARCH PROMOTION PROGRAM

This program is a cross-departmental CiDER program that promotes cutting-edge basic research aimed at fundamentally overcoming infectious diseases.

Currently, 36 proposals are already underway, and new applications are also being accepted for the start of FY2023.

## Application Requirements

- (1) The applicant must be a principal investigator (laboratory director) at Osaka University and a principal investigator (project PI) of the research project for which the application is being made.
- (2) At least one principal investigator (laboratory director) who is mainly affiliated at a department of the University different from the applicant's main affiliated department should be included as a co-principal investigator in the research project (co-project PI).
  - ※ If the project PI and co-project PI are not a regular or concurrent member of CiDER at the time of application, the co-project PI will be required to be a concurrent member of CiDER after selection.

## Major changes from FY2022

The research adopted in FY2023 will be conducted not only in the natural sciences, **but also in the humanities and social sciences**, as part of interdisciplinary research on infectious diseases!

## Financial Support

### Amount:

Up to 5 million yen per year, and up to 10 million yen in total over two years

Number of projects to be selected:  
Approximately 10

## Application Deadline

**Tuesday ,28 Feb 2023**

Application Details

This project is part of the Nippon Foundation - Osaka University Project for Infectious Disease Prevention.
